

This is an easy reference guide to OEM's that offer a Price Matching Program whereby your shop can offer OEM Parts at Aftermarket Pricing without hasseling with insurers or asking the customer to pay the difference. It also provides you information of which manufacturers offer a OE Certified Body Shop Program whereby your shop can apply for that status as a way to increase that vehicle line into your shop. Not all OE's offer these.

Auto Manufacturers

General Motors	YES	NO	Call/Fax/OEC	
Ford-Lincoln				

ALL our CPG Dealers participate in their perspective manufacturer Price Matching Programs unless noted with a DNP.

ALL of our CPG Dealers also offer to reduce prices as best they can on parts that may not be in their OEM's PMP, therefore CPG Recommends shops always ask our OEM dealers first on all specified AM and/or Used parts to see how close they can come on pricing for any parts outside of their program. -

Shops can use these programs as a marketing tool with their customers by informing them you will replace AM or used parts that have been specified by their insurer with OEM, at no additional cost to them or their insurer, making for a safer repair and back to original.
